Our Goal

To build an Integrated AI Agentic Cyber Security Framework with automated Agentic Security Research Center and Agentic eLearning Security Management System.

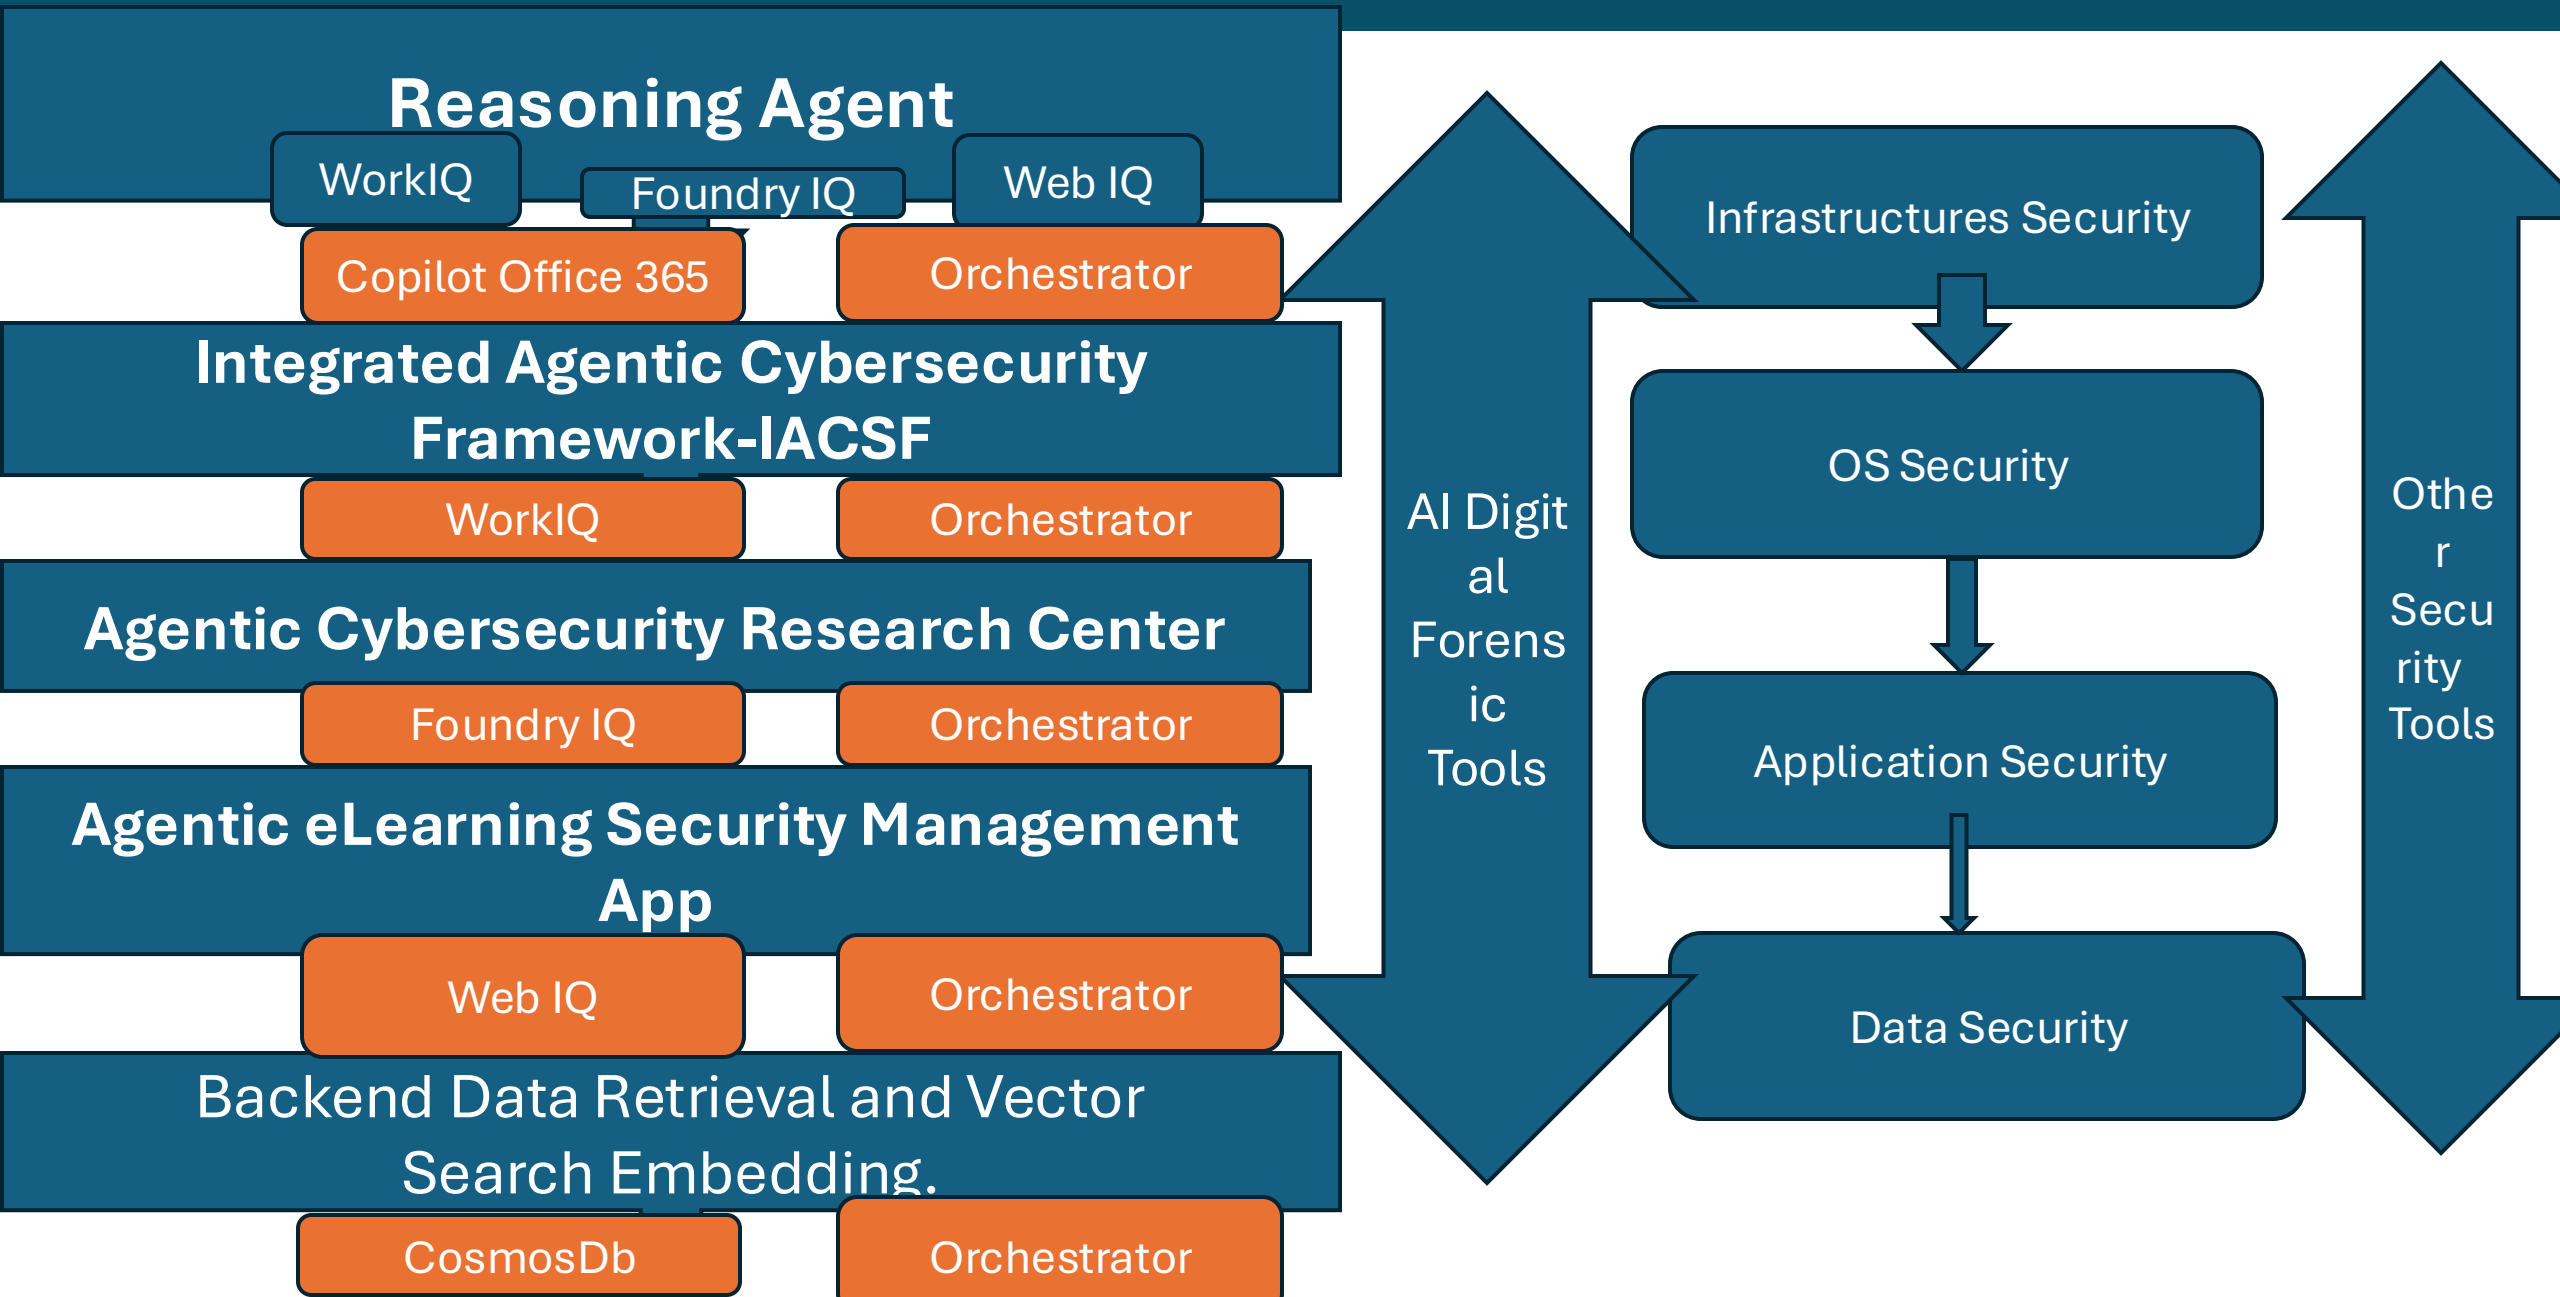

To Tailour out a more proactive Security Solution across the entire Tech Stack (Infrastructures, Platforms/OS, Applications and Data Layers).

To ensure that the IACSF does not end as just a holistic Security document, but practically implemented in lab demos and seamless Security Research Center with Realtime Agentic Security Operations, and Monitoring in realtime agentic threat protection.

To leverage on the chain of agentic workflow to build a sustainable Elearning Security Management App, endisuring that all controls and modules in the IACSF are disseminated across Stakeholders and Entities through well packaged modular Security Traings and Certifications.

Project Overview/Workflow

Integrated Cybersecurity Agentic Framework-IACSF

(Main Orchestrator)

- Documented IACSF as the Main Orchestrator and Pointer.
- Customized Template with Entity Mapping across Infrastructures, Platforms, Applications and Data Layers.
- Open for Contributions to ensure no control is missing.
- Most Standard Security Frameworks must align with dpace to accommodate subsequent Frameworks:
 - ISO 27001
 - Center for Internet Security(CIS)
 - HIPAA
 - Microsoft Cybersecurity Benchmark
 - Zero Trust
 - ISO 42001
 - RMF 100
 - Others

IACSF

Integrated Agentic Cybersecurity Framework

Agentic Cybersecurity Research Center

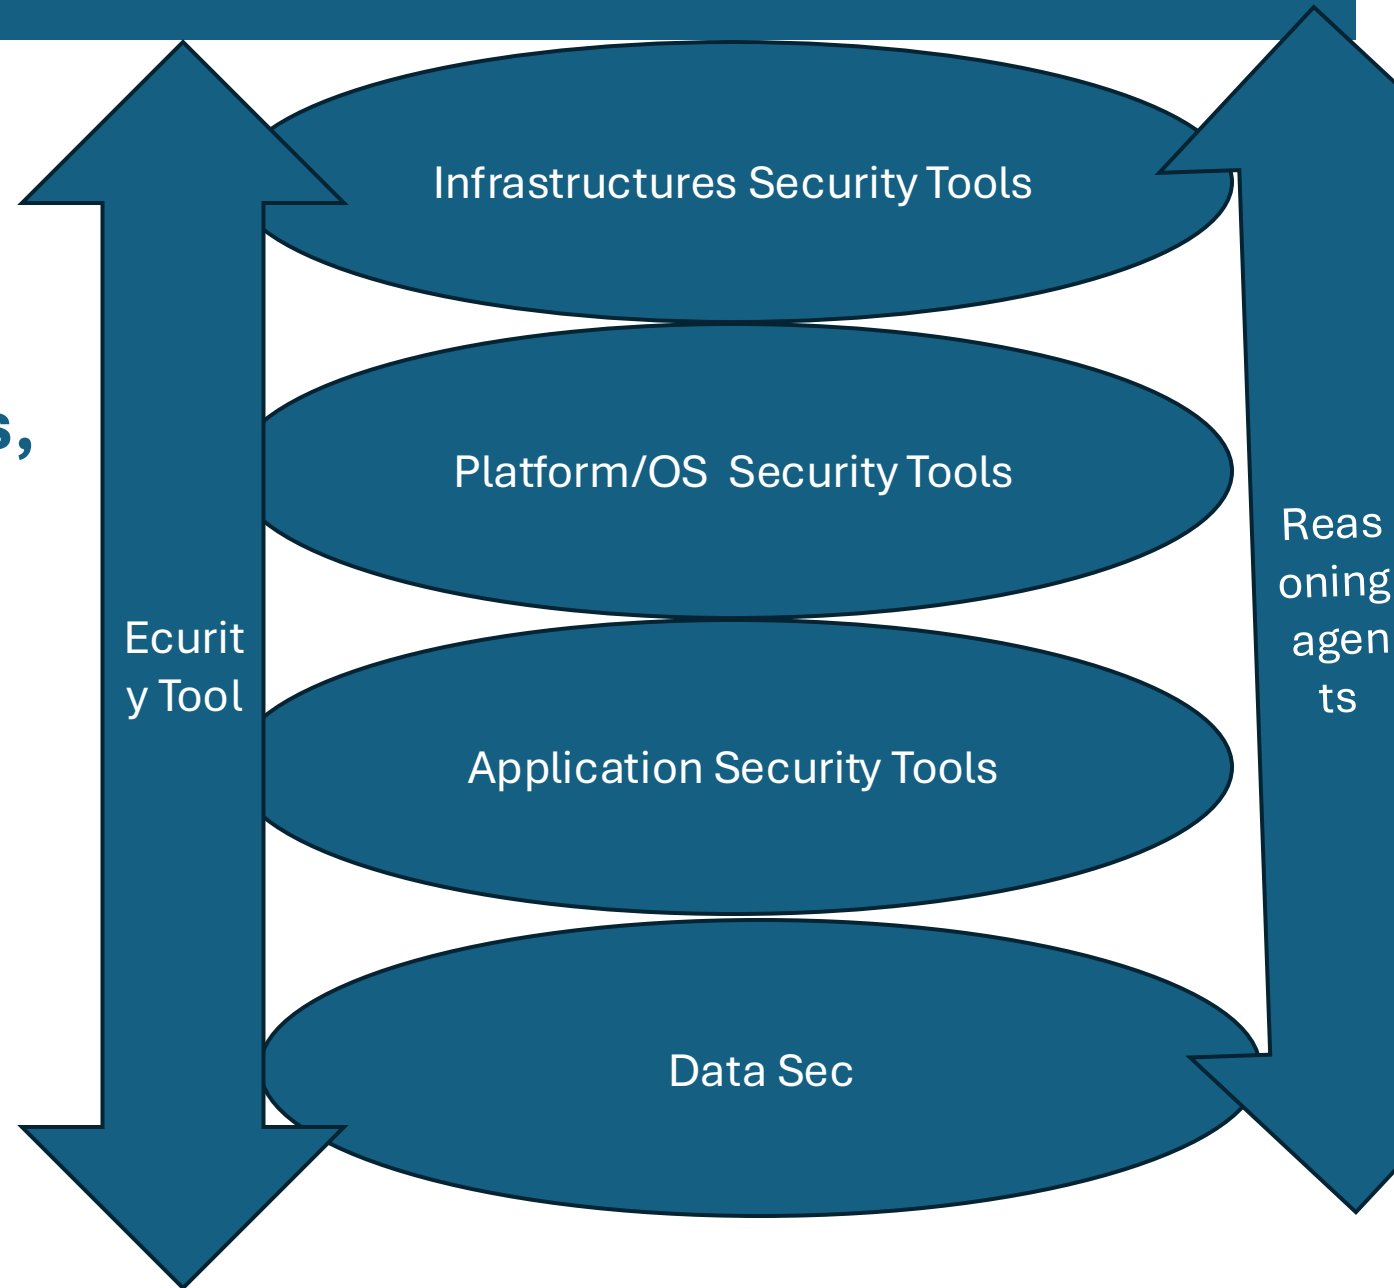

Agentic e-Learning Security Management App

Microsoft 365 Copilot

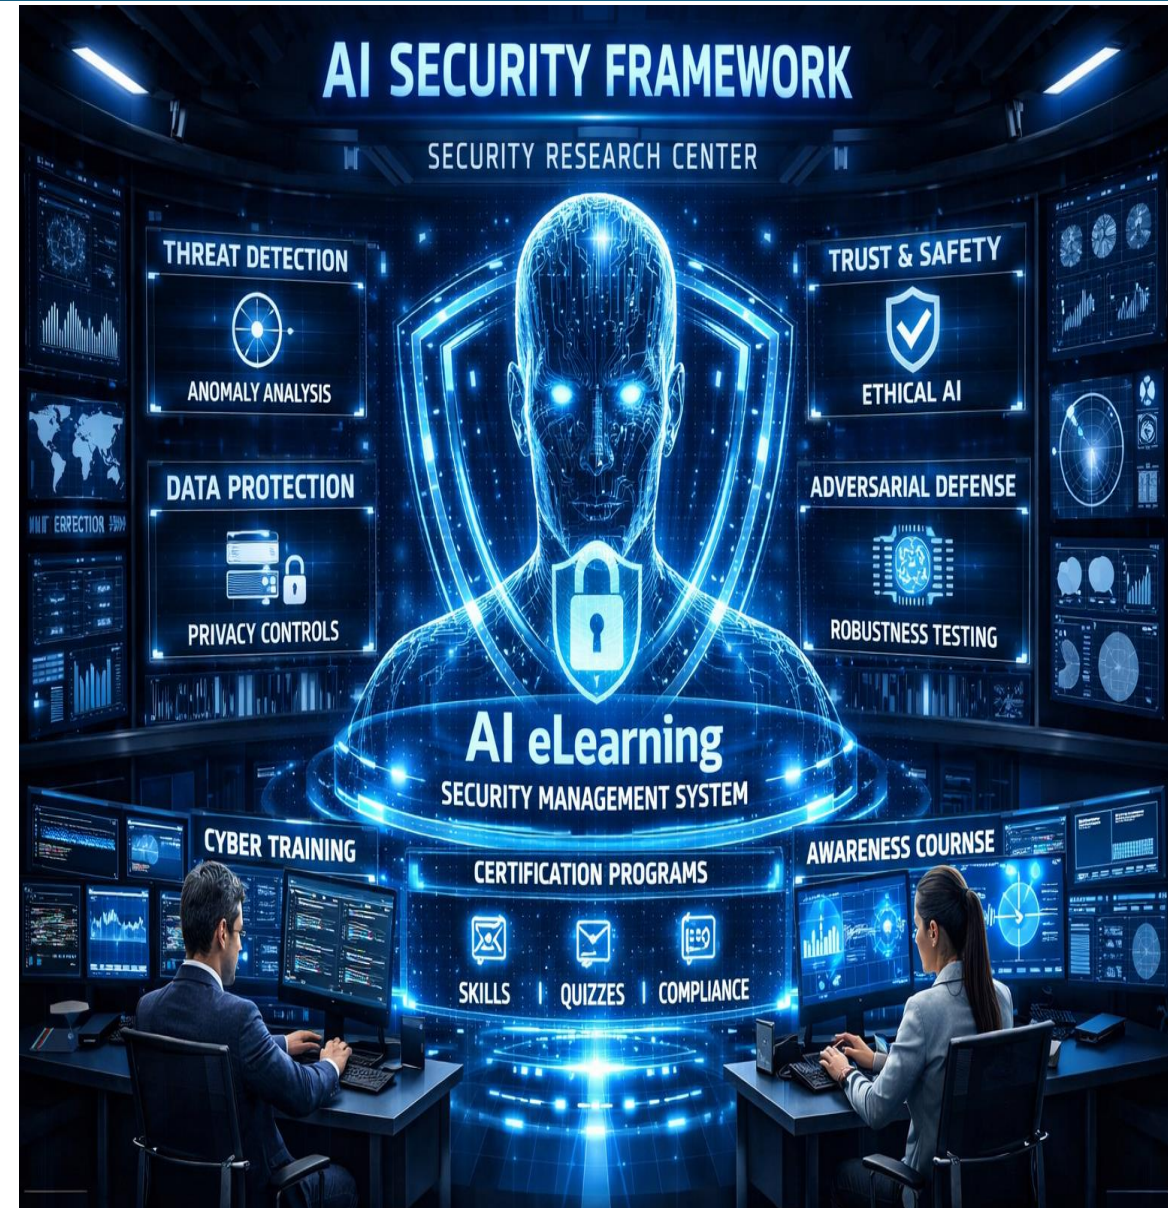

Agentic Security Research Center

- **Real-time Detection, Alerting and Orchestration.**
- **Interactive labs: forensic investigations, DLP simulations, workflow orchestration.**
- **Forensic traceability with Autopsy**
- **Web dashboard for monitoring threats.**
- **Threat Protection**
- **Vulnerability Scan**
- **Security plug-ins**

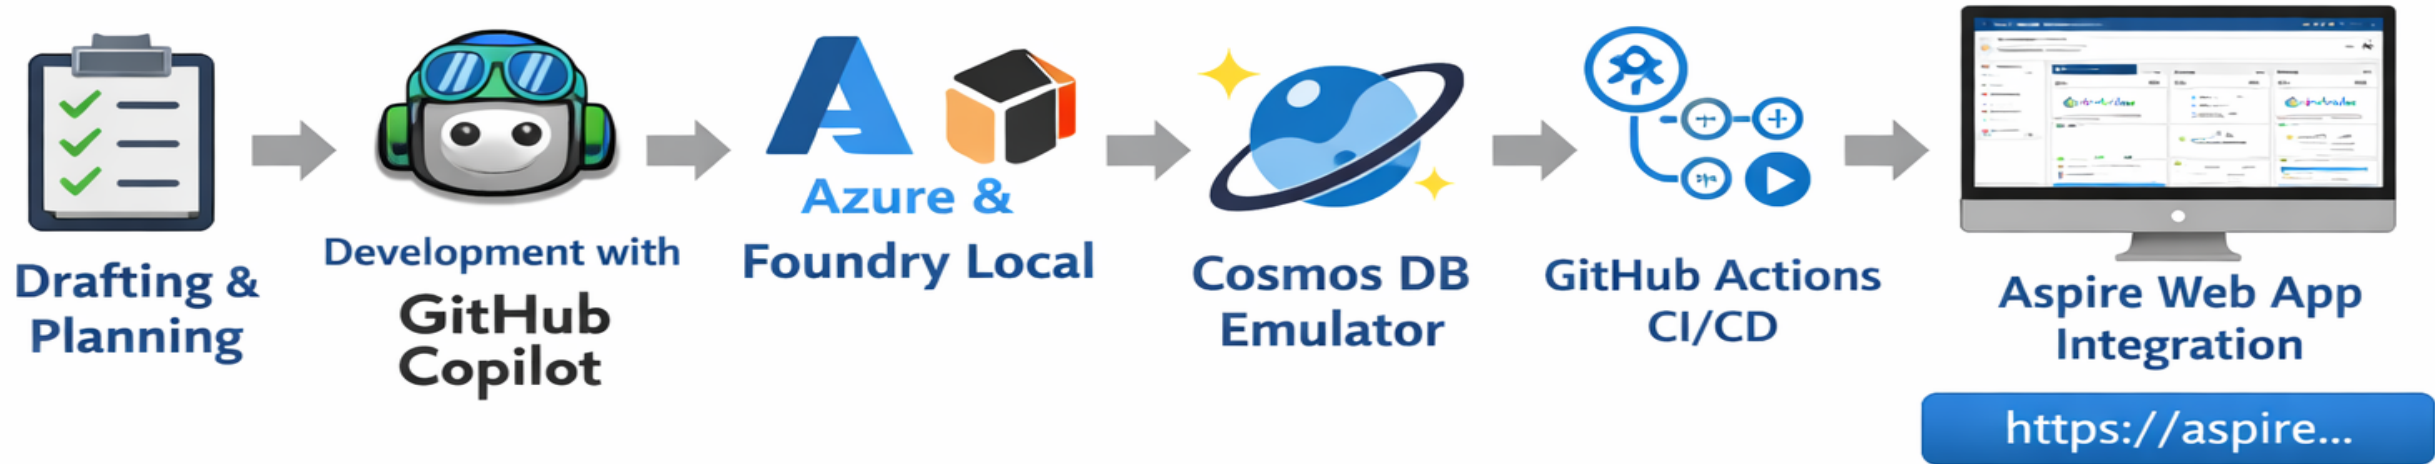

Agentic eLearning Security Management

- Reasoning Agentic Workflow for adaptive learning
- LMS dashboards for learner progress & research simulations.
- Certification pathways across the Controls and the Security modules in each layer of Technology.
- Realtime Agentic workflow through enrollment, on-boarding, learning, Self-Assessment to learning completion and certification.

Integration Workflow

Impact & Next Steps

Strengthens proactive cybercrime defense and full alignment with the Standard Cybersecurity Frameworks such as ISO 27001, CIS, NIST-Cybersecurity, ISO 42001, RMF-100, CSA, CISA and others.

Realtime automated Security Research and Monitoring Center with Threats Protection and triggers on anomalies.

Provides structured Agentic eLearning Security Management with certifications & hands-on labs.

Roadmap

- **10-Day Build Plan** (3-in-1 Integrated Agentic Cybersecurity Framework , Security Research Center and + LSMS)-IACSF
- **GitHub Copilot Implementation** for modular coding & orchestration.
- **Reasoning Agent** with Work IQ, Foundry IQ, Fabric IQ, Web IQ.
- Expand certifications & labs as standards evolve.
- Locally hosted on Aspire.
